ABSTRACT

In recent times it has become a hassle for everyone to find the required components for their computers as finding the suitable and latest equipment is problematic as it requires much time and the product are many times very difficult to find. Using e-commerce is the very good solution to the stated problem. Many people now prefer shopping online and getting the goods delivered to them rather than having to visit the stores as the latter is hassle free. Electronic commerce, commonly written as e-commerce, is the trading or facilitation of trading in products or services using computer networks, such as the Internet. The drivers for electronic commerce are both technological (under the tremendous pressure of innovation) and business oriented.

Procomp.com is an e-commerce website allows consumers to electronically exchange goods and services with no barriers of time or distance. Electronic commerce has expanded rapidly over the past five years and is predicted to continue at this rate, or even accelerate. The demand for the computers is also very high in almost all the sections of society like education, home & offices etc.

Procomp.com will provide door to door delivery of all the computer components, accessories and other digital products in almost all the parts of the nation. It will support various payment systems like COD (Cash on Delivery), Debit/Credit cards, Net-banking etc. It will also have support for EMI facility for the eligible product. Procomp.com has a wide scope with supports for all major platforms like WINDOWS & MAC etc. The system will be run on a central server with each user having a remote user interface through a web browser to interact with it.

Procomp.com will allow user to search for various computer components & accessories including those that are normally difficult to find in the market. The can also learn about the detailed specification of the products and its price. It will allow any user to create an account to become a customer. Only the registered customer will be allowed to place an order. It will also enable them to resolve any query related to any product in the Q&A section. It will also provide updates to the regular customers about their orders and also regarding various offers through automated e-mails & SMS.
